PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on production experience building and shipping web applications using React.js, Next.js, and TypeScript, backed by working backend experience in Node.js, Express.js, and REST APIs. Currently deliver client projects end-to-end at a service-based development company — from Figma implementation through authentication, API integration, and deployment. Drove 4 client projects from requirements to production handover, working directly with business workflows, third-party integrations, and role-based access systems.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
Backend & APIs	Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access
State & Data	Redux Toolkit, RTK Query, React Query, Axios
Database & Services	MongoDB, Firebase, Supabase, Strapi, Sanity, Payment Gateway Integration
Tools & Deployment	Git, GitHub, Vercel, Netlify, Linux/CLI, Postman, Chrome DevTools, VS Code
Additional	WebSockets, React Native, Electron.js, Vue.js, Figma, GSAP, Framer Motion, JSON Server

PROFESSIONAL EXPERIENCE

Full-Stack Developer — SM Technology

December 2024 – Present

Dhaka, Bangladesh

- Led 4 client projects from requirements gathering through production handover, coordinating frontend and backend development to meet client business workflows.
- Engineered production web applications using React.js, Next.js, and TypeScript, translating Figma designs into responsive, accessible dashboard interfaces.
- Developed backend services and REST APIs with Node.js and Express.js, implementing JWT authentication, protected routes, and role-based access workflows.
- Managed application state and data fetching using Redux Toolkit, RTK Query, React Query, and Axios across multiple client dashboards.
- Integrated third-party services including payment-related integrations, email/notification services, Google Tag Manager, and external APIs; handled deployment on Vercel and Netlify with Linux/CLI-based production troubleshooting.
- Debugged and refactored existing codebases via Git/GitHub to resolve production issues, improve maintainability, and implement SEO-related enhancements.

Software Developer Intern — Greenie Web

January 2023 – March 2023

Singapore

- Built and improved desktop application UI and functionality using Electron.js and JavaScript.
- Implemented responsive interface components and contributed to feature development on an existing desktop application.
- Debugged and resolved application issues, supporting overall stability and usability improvements.

SELECTED PROJECTS

ActiveQuest

Next.js, React, TypeScript, Tailwind CSS, REST APIs, Google Tag Manager

- Created frontend features for a class/session discovery platform, including class sorting, dashboards, and session-based UI for recurring weekly classes.
- Implemented trial-class workflows offering 2 free trial classes with 7-day validity, connected to backend APIs.
- Integrated Google Tag Manager and delivered the platform to production.

Underground Arena

Next.js, TypeScript, Tailwind CSS

- Developed an online gaming tournament platform supporting player, tournament organizer, and administrator workflows.
- Built team/group management, tournament participation, live scoring, and leaderboard features to track player performance.

Client & Business Web Applications

- Delivered production websites for clients from Figma designs, implementing responsive interfaces, API connectivity, and translations.
- Handled third-party integrations, SEO improvements, debugging, Git collaboration, deployment, hosting, and production handover.

EDUCATION

BSc in Computer Science & Engineering

2024 – Present

Dhaka International University, Dhaka, Bangladesh

Diploma in Computer Science & Technology

2019 – 2023

Mymensingh Polytechnic Institute, Mymensingh, Bangladesh

TRAINING

Complete Web Development Course — Programming Hero

LANGUAGES

Bengali (Native), English (Intermediate), Hindi (Intermediate)
