SHABBIR AHMED SHUVO

Full-Stack Developer | React • Next.js • TypeScript • Node.js

Dhaka, Bangladesh • +880 1762-583535 • sabbirshuvo006@gmail.com • Portfolio • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Full-Stack Developer with a strong frontend focus and commercial experience engineering production web applications using React, Next.js (App Router), TypeScript, and Node.js. Delivered 9+ full-stack client platforms and web applications—handling Figma design translation, secure REST APIs with RBAC, state orchestration with RTK Query, payment integrations, and deployments across Linux and cloud environments.

TECHNICAL SKILLS

- **Languages & Frontend:** TypeScript, JavaScript (ES6+), React.js, Next.js (App Router, SSR), Tailwind CSS, Framer Motion
- **State & Data Layer:** Redux Toolkit, RTK Query, TanStack Query, Axios Interceptors, Context API, REST APIs
- **Backend & Auth:** Node.js, Express.js, WebSockets, JWT Authentication, Role-Based Access Control (RBAC)
- **Databases & DevOps:** MongoDB, Firebase, Supabase, Stripe, SSLCommerz, Google Tag Manager, Git, Linux (PM2, Nginx), Vercel, Netlify

PROFESSIONAL EXPERIENCE

SM Technology — Full-Stack Developer | Dhaka, Bangladesh

December 2024 – October 2026

- Architected and delivered 4 commercial client web platforms end-to-end for production environments, managing full lifecycle implementation from Figma UI specs to cloud deployment.
- Built responsive, accessible admin dashboards and portals in Next.js and TypeScript matching Figma design systems with high fidelity.
- Engineered RESTful APIs in Node.js and Express, implementing JWT authentication and granular RBAC to safeguard tenant data.
- Structured client-side caching and state via Redux Toolkit and RTK Query to eliminate redundant data fetches and improve response speed.
- Integrated payment gateways (Stripe, SSLCommerz), automated transactional emails, and event tracking via Google Tag Manager.
- Maintained continuous deployments across Vercel, Netlify, and Linux servers configured with Nginx reverse proxy and PM2.

Freelance / Independent Client Projects — Web Developer | Remote / Dhaka, Bangladesh

April 2023 – November 2024

- Delivered 5+ full-stack client web applications from scratch using React, Next.js, and Node.js, managing end-to-end database schema design, REST API integration, and cloud hosting deployments.

Greenie Web — Software Developer Intern | Singapore (Remote)

January 2023 – March 2023

- Developed cross-platform desktop UI components using Electron.js and JavaScript, resolving defects to improve consistency and memory usage.

SELECTED PROJECTS

Underground Arena — Real-Time Esports Tournament Platform | Live: underground-arena.org

Tech Stack: Next.js, TypeScript, Tailwind CSS, Node.js, WebSockets, MongoDB

- Engineered a real-time esports tournament engine using WebSockets to handle live bracket state synchronization across concurrent active users, eliminating manual page refreshes.
- Designed MongoDB schemas and Node.js services managing player registrations, bracket seeding, and match state persistence.

ActiveQuest — Class Discovery & Booking Platform | Live: activequest.co.za

Tech Stack: Next.js, TypeScript, Tailwind CSS, Redux Toolkit, REST APIs, Google Tag Manager

- Engineered a high-performance class discovery and booking platform featuring multi-parameter filtering, recurring schedule management, and role-based access control (RBAC) dashboards.
- Built an authenticated trial-booking funnel with 7-day token expirations and integrated Google Tag Manager event tracking.

EDUCATION

Dhaka International University — BSc in Computer Science & Engineering *(2024 – Nov 2026)*

Mymensingh Polytechnic Institute — Diploma in Computer Science & Technology *(2019 – 2023)*
